Airport Terminals, Hangars And Other Aviation Facilities

► Roanoke Airport

Roanoke, VA

Two types of soffit panels from ATAS International Inc., Allentown, PA, were used on this project. Blake Construction Of Virginia Inc. in Roanoke installed 6,840 sq. ft. of MPS120 solid soffit panels and another 548 sq. ft. of MPV120 vented soffit panels. Both profiles were formed from .032" aluminum with an

Ascot White finish.

The project was finished in September 2004. Roanoke-based ABC Supply was the panel distributor.

▼ Fidelity National Corporate Hangar

Jacksonville, FL

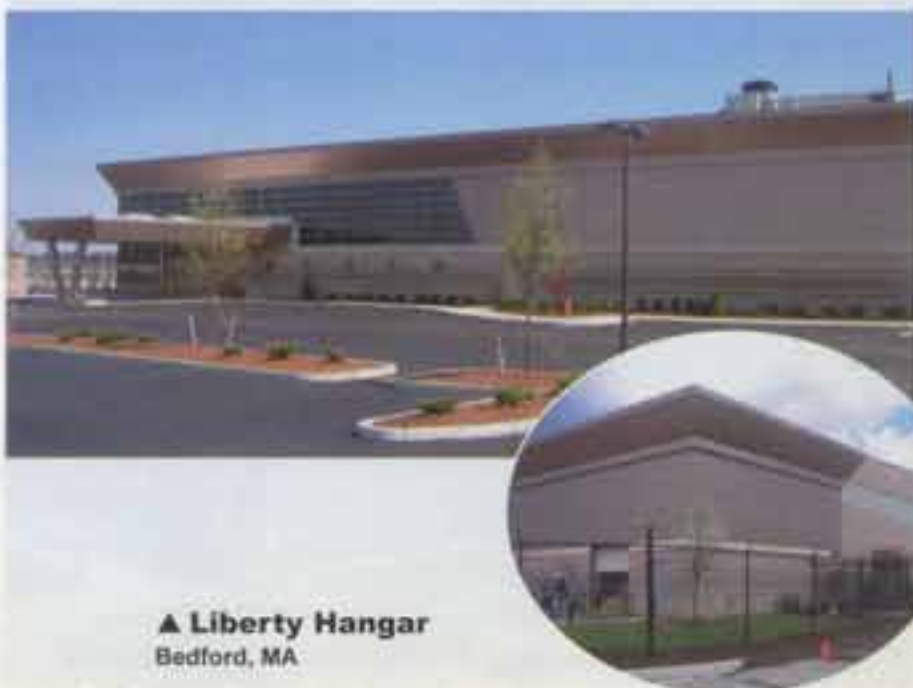

This project, consisting of a 30,000 sq. ft. hangar and 8,000 sq. ft. office with a mezzanine, was built with rigid frame and continuous beam systems from VP Buildings, Memphis, TN. The hangar portion has a 200' clear span.

White SSR panels top the building. On the walls, Panel Rib panels in Blue Ashgray were installed.

Construction on the facility began in November 2003. It was finished in February 2004 at a cost of \$5 million.

Harrell Construction Co. Inc. was the VP Builder. The Haskell Co. was the designer. Both firms are located in Jacksonville.

Completed in April 2005, this project utilized a metal building system from Metallic Building Co. of Houston, TX. Erector Barnes Buildings, Weymouth, MA, installed 18,000 sq. ft. of Metl-Span's CF-42 Flat 200 insulated ribbed sandwich panels on the walls. The R-20, 2-1/2"-thick panels consist of 26-gauge galvanized steel skins and a polyisocyanurate core. The Lewisville, TX, manufacturer provided the panels with a Desert Beige finish on the exterior and Igloo White on the interior.

Brophy Phillips served as the general contractor. The designer was BKA. Both firms are based in Brockton, MA.
